

# Fit for 55

Energy poverty provisions in the proposal for

## Energy Efficiency Directive (EED) recast

**SocialWatt webinar**  
**17 November 2022**

Veronika Jiříčková  
Energy Efficiency Unit, DG ENER.B2  
European Commission

# Energy poverty related provisions – EED recast

## Energy efficiency

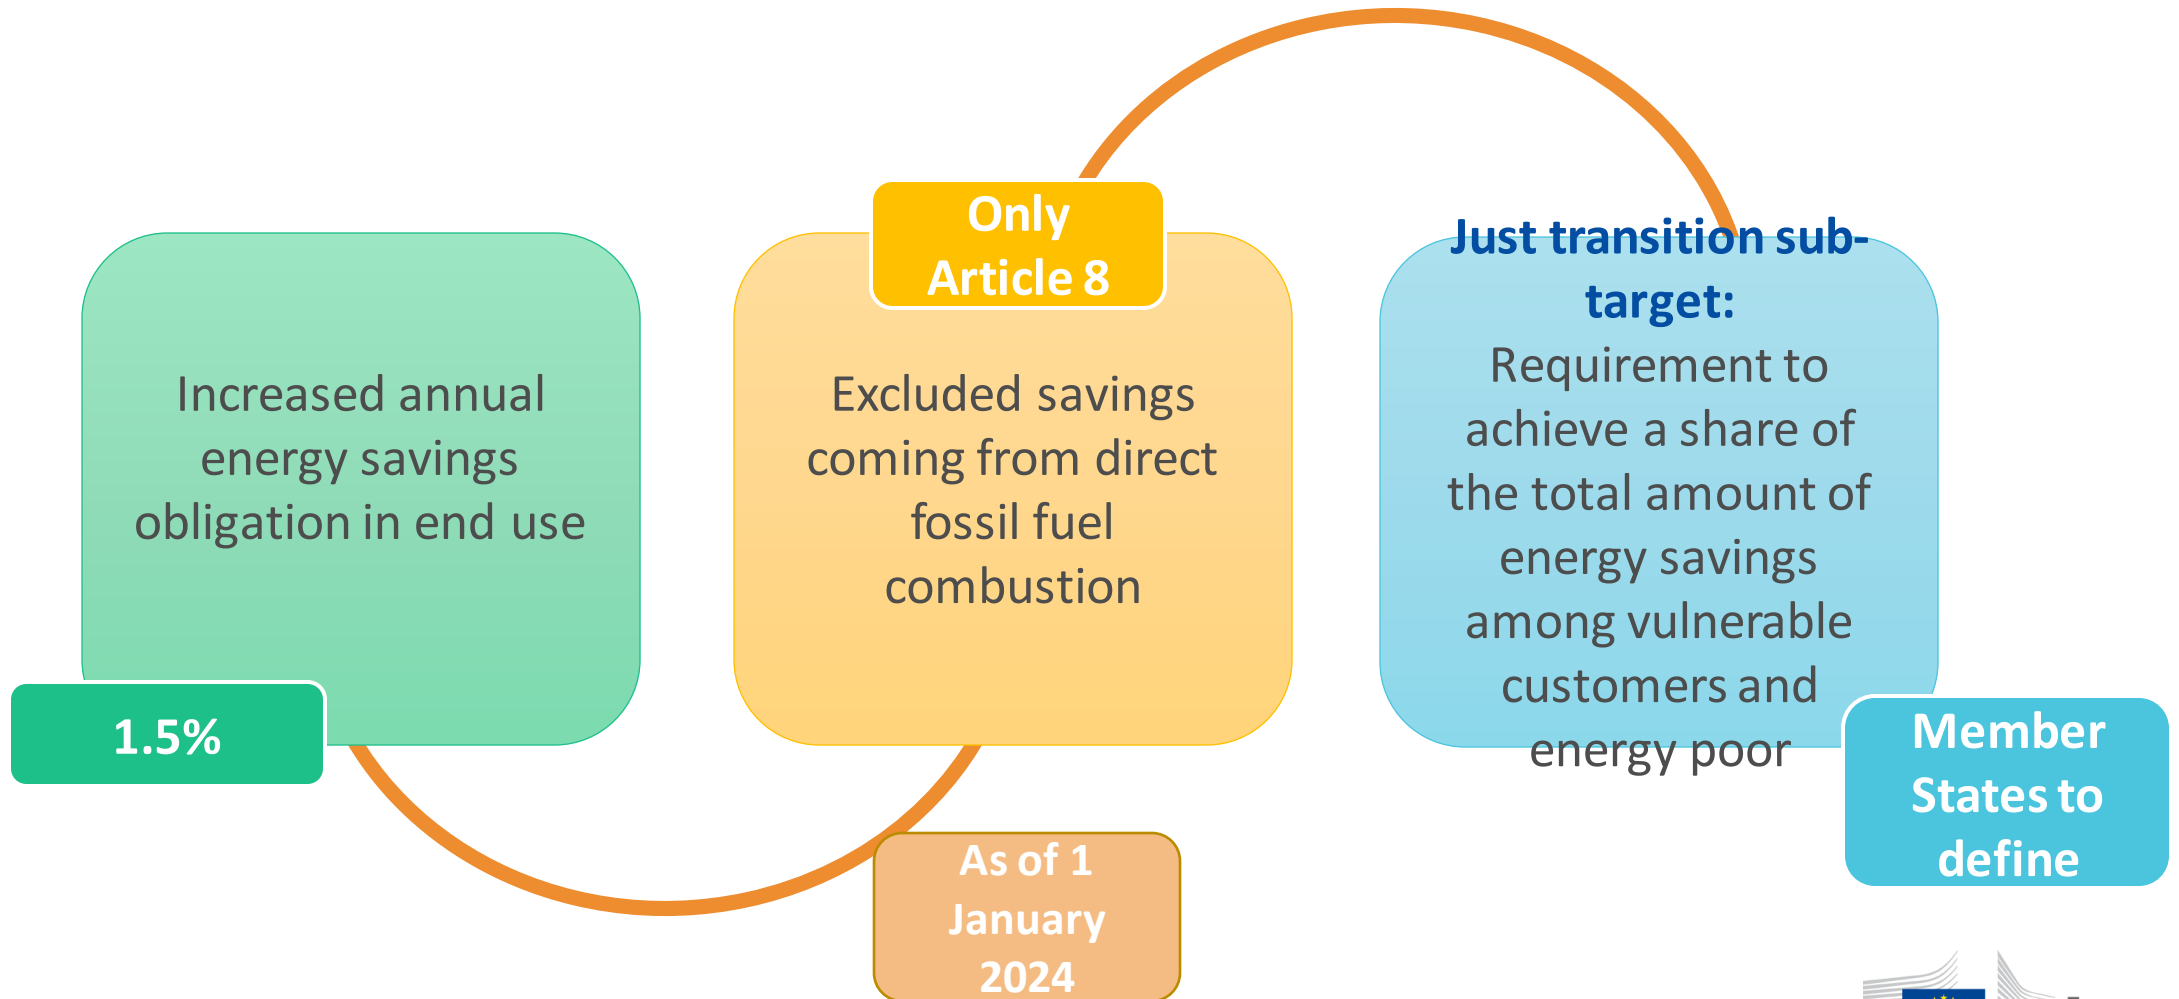

=

the most effective solution to:

- alleviate energy poverty and
- overcome some of the potential negative distributional impacts of pricing measures.

Article 8 and Article 22 of EED recast proposal

# Article 8 – Energy savings obligation

# Contributing to a just transition – Article 8(5),

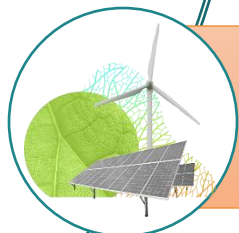

Each Member State to achieve a **minimum share** of the required cumulative amount of energy savings among people affected by energy poverty, vulnerable customers and, where applicable, people living in social housing.

This **individual share** shall at least equal the proportion of households in energy poverty as assessed in each Member State's **NECP**.

**If not notified in the NECP**, the share shall be calculated in accordance with **indicators** provided in Article 8(3).

Member States shall submit required information in the updates of their NECPs (in line with the 'Governance Mechanism').

# Article 22 – Vulnerable consumers and energy poverty

## Member States:

Shall **prioritise for energy-poor and vulnerable households**

Shall take **measures to empower and protect** energy-poor and vulnerable households

Shall make **best possible use of public funding** - at national and Union level – to empower and protect vulnerable customers and to alleviate energy poverty

Shall establish a **network of experts** to develop strategies in implementing energy efficiency improvement measures alleviating energy poverty

ETS

Increase clean energy offer to end users  
Innovation & investment in new energy sources  
Modernisation of existing infrastructure

SCF

25% of revenues from ETS extension  
Temporary direct subsidies to households and transport users
